Impact 3
Unit 8
Meet the Explorer Video Script
Scene 8.2: *Meet Paul Miller/DJ Spooky*

Paul Miller: As a DJ, my tools are information. We live in a data driven society. I wanted to make music that reflects that. Music has a very beautiful relationship to all of the things that shape modern ideas about time, space, geography. Art and music and science and technology, to me, are not separate things. Digital media has become the basic vocabulary of how people experience everything. And I firmly believe that as we move further into the 21st century, one of the major issues facing us is climate change. The artist's role is not to say, "Hey, this is interesting," but to say, "you can't live life without thinking a different way about this. Another world is possible."
