TR: 45 3 **Learn new words.**

comfort	Some people choose clothes based on comfort, not fashion.
cotton	Our jeans and T-shirts are made from cotton.
creativity	We can use clothing to show our creativity.
crop	Growing crops such as cotton or wheat takes a lot of water.
designer	Designers draw their ideas first, and then make them into clothes.
do one's part	Let's do our part to reduce our fashion footprints.
fit in	Most teens want to fit in with others at school.
footprint	People can buy less to reduce their fashion footprints.
have an impact on	The fashion choices we make have an impact on the environment.
manufacture	The manufacture of some clothing uses a lot of water and energy.
material	Clothing can be made of many different materials.
style	Young people often have a different style than their parents.
synthetic	Synthetic materials don't come from plants or animals.
take responsibility for	It's important to take responsibility for our choices.
toxic chemical	To produce clothing, toxic chemicals are sometimes released into the air and water.
trendy	Many people prefer to wear trendy clothes that are in style.

TR: 46 5 There are many different reasons we buy and wear the clothes we do. We choose clothes for practical reasons, such as weather and comfort. We also wear the clothes we do for psychological reasons. These include wanting to feel powerful, to feel attractive, and to show our creativity and personality. Wearing certain styles affects how we feel about ourselves and how other people see us. We may care about the latest trendy fashion by popular designers, or we may prefer practical clothes. And finally we make our clothing choices for social reasons, such as showing we want to fit in with a group, or making a statement about our beliefs.

TR: 47 5 **Learn new words.**

attractive	The clothes we wear can make us feel attractive.
popular	A lot of people wear clothes from the most popular designers.
psychological	We choose clothes for psychological reasons, such as feeling good and fitting in.
social	We dress up for social events like parties and dances.

TR: 48 Speaking Strategy See Student Book p. 63.

TR: 49 7 **S1**: So the colors we wear definitely affect us psychologically and physiologically. **S2**: I'm not sure I get it. When you say physiologically, what do you mean?

S1: I mean how it makes you feel. **S2**: Are you saying that the colors of the clothes we wear can make us feel sick?

S1: No, that's not it. What I mean is that colors affect our moods. You know, blue makes people feel calm and relaxed, and red makes them feel excited and energetic. **S2**: Could you explain that a little more?

S1: Sure. Blue and red are associated with those emotions. But there are physical effects on the body, too. Blue causes the body to produce calming chemicals, and red causes you to breathe faster.

TR: 50 Grammar See Student Book p. 64.

TR: 51 11 A lot of our clothing is made from natural materials such as cotton, wool, leather, and silk. Synthetic materials such as nylon and polyester are also very popular. But all of these materials, whether natural or synthetic, affect the environment. For example, many toxic chemicals are used to make your leather shoes. The manufacture of your cotton jeans requires enormous amounts of water and energy. And if dyes are used to color any of these materials, then even more water, energy, and toxic chemicals are required.

TR: 52 14 Nearly two billion pairs of jeans are made every year. Cotton and other materials are sent to the factory where the jeans are assembled. Jeans are then shipped to a warehouse, and later sent to a retail store. Jeans can travel up to sixty-five thousand kilometers before they're purchased by a customer. With every step in the process, the cost of jeans goes up! Did you know that when you buy a pair of jeans, you might be paying more than four hundred times the cost of manufacture?

TR: 53 14 **Learn new words.**

assemble	A pair of jeans is assembled very quickly.
factory	Jeans are made in factories.
purchase	Most people purchase jeans at retail stores.
retail store	Retail stores sell things to the final users, not to other stores.
ship	Jeans are shipped around the world.
warehouse	Jeans are sent from the factory to a warehouse.

TR: 54 18 **Learn new words.**

donate	It's best to donate clothes that don't fit you.
eco-friendly	Natural materials are more eco-friendly than synthetic materials.
entrepreneur	Santana Draper is a young entrepreneur with his own business.
give back	Some people like to give back to the community when they have more than they need.
profit	Some companies give part of their profits to environmental organizations.
