Impact 4 Workbook
Audio Script
Unit 2

TR 6:
4. Listen and complete the chart. Then answer the questions in full sentences.

Good morning everybody. Welcome to our school's first "Digital Humanitarian" camp! It's great to see you all here. Not only will you be learning and using your technological skills, but as volunteers, you also will be helping people in great need around the world.

Let's talk about the types of activity you will be doing each day. Fortunately, we have a good Internet connection here at the school and this, as you will see, is very important. Take a look at the timetables we gave you.

Every day we'll send specific instructions. So the first thing you'll do is go online and check your emails.

On Monday, you'll be looking at photos on our website and deciding how serious the damage is to the buildings where the disaster has taken place. You'll use a red code to identify the buildings you see with the worst damage.

On Tuesday, you'll be reviewing and uploading the red-coded photos onto our website.

On Wednesday, you'll be doing something different. We receive a lot of text messages in different languages. You will be collecting these and sending them to translators in different locations around the world.
Then on Thursday, you'll be reading text messages in English and highlighting important information.

As I said, we'll send you any further instructions by email. Of course, I will be here too if you have any questions. Thanks again for joining our digital humanitarian camp this week and becoming digital volunteers.

TR: 7
7. Listen and read. As you read, think about how the title and the saying are connected.

TR: 8

11. Listen and check **T** for *True* or **F** for *False.* Rewrite any false sentences as true.

S1: Did you know that seven billion people live on the planet?

S2: Yes, and two thirds of the people on the planet have a cell phone!

S1: I was reading an article about text messaging. The number of messages is growing all the time. At the moment there are 500 million text messages a day across the world!

S2: Really!

S1: Yes, and apparently, more than half of all text messages have a photo.

S2: Did the article say how many people under the age of 18 text?

S1: Yes. About 16 percent of people texting are under 18. The majority of people texting are between 18 and 29 years old.

S2: And what about older people?

S1: The article said that only a small number of people over the age of 65 send messages. But, I think that number is growing.

S2: Yes, I'm trying to get my grandmother to send text messages!

TR: 9

12. Listen. Circle the expression that summarizes the information about the event.

We are happy to report that the Springfield School Run was a great success. This event raised over $3,500 for a local children's charity! The 10-kilometer-long run was around the park at the edge of town. Many students and teachers signed up—300—in fact.

Of the 300 who signed up, only 5 students didn't show up because they were sick. One of those students broke a leg in a football game the week before!

Ninety percent of the runners were students and the other 10 percent were actually teachers at the school.

The great majority of the runners had been training for weeks before the event, but 25 runners didn't feel well and needed medical assistance during the run. That didn't stop them from finishing the race, though. They managed to continue to the end.

Of the 300 participants, 160 runners finished the run in under an hour and 30 minutes.

Congratulations on such a successful fundraiser!
