Impact 4
Unit 5
Meet the Explorer Video Script
Scene 5.2: *Meet Corey Jaskolski*

Corey Jaskolski: I'm an engineer primarily and all of my work is focused on helping people see the world in a new light. By that, I mean developing technologies to help us peer into the world in a way we haven't been able to before. Technology can stand where we can't. This is right on the edge of the big drop off, 40 m (130 ft.) deep. So it's turning around taking a picture, turning around taking a picture…You can see the system do its…do its dance. I believe that we have a responsibility to record these things the best we can, so that maybe people in future generations can continue to learn from our mistakes and maybe make better choices. Going forward, we hope to keep developing these technologies as well as others to really show people their world in a new light and help convince them that it's worth protecting.
