DEATH VALLEY

Death Valley National Park is the largest national park in the continental United States. This 3.3 million-acre park in southern California is the lowest, hottest, and driest place in North America. The lowest point is 282 feet (86 meters) below **sea level**. In the summer, the average temperature is 115° (46° Celsius), and the highest temperature ever recorded here was 134° (56.6° Celsius). There are some summers when Death Valley receives no rain, and the average yearly **precipitation** is less than two inches.

The first visitors to this desert area were different tribes of Native Americans. They walked through this area but did not stay.

In 1849, people heard about the discovery of gold in California. Thousands of people began the long trip to the West. This large desert area was so difficult to cross that it received the name Death Valley.

Today, tourists from all over the United States travel to Death Valley to enjoy its natural beauty. There are over one thousand **varieties** of plants in this desert, including many kinds of cactuses and flowers. Cactuses, with their interesting and unusual shapes, need very little rain. Their **roots** are close to the surface of the ground so they can quickly collect any rainfall. A few days after the first rain in the spring, thousands of wildflowers cover the desert.

There are also many animals that have learned to **adapt** to this hot climate. Most are active at night, sleeping during the day to **avoid** the hot desert sun. Some animals live their entire lives without drinking any water, getting water from the food they eat.

If you are planning a trip to Death Valley, winter is the best time to visit. The main visitor area has nature **exhibits**, a museum, and a bookstore. Be sure to watch the informative videos on desert life. After that, you can explore the desert by car, by bike, or on foot. Park rangers offer programs on desert life, the history of Death Valley, and the desert sky at night. If you are planning a trip to Death Valley, don't forget these four essentials: a sun hat, sun block, a lot of water, and a camera.  17

A What do you know about deserts? Circle True or False.

- | | | |
|---|------|-------|
| 1. A desert receives very little rain. | True | False |
| 2. The only plants in the desert are different kinds of cactuses. | True | False |
| 3. Animals cannot live in the desert. | True | False |
| 4. Summer is the best time to visit the desert. | True | False |

A CIVICS Read the student report about California.

A beach in La Jolla, California.

California is on the west coast of the United States and it's the third largest state. It has borders with Oregon to the north, Nevada and Arizona to the east, Mexico to the south, and the Pacific Ocean to the west. Sacramento is its capital. The population is over forty million.

California is a beautiful state. Its coast has hundreds of miles of beautiful beaches. There are two mountain ranges in California, the Sierra Nevada in the east and the Coast Ranges along the Pacific. There are several deserts in the southeast.

Two of the major cities are San Francisco and Los Angeles. San Francisco is on the hills over San

Francisco Bay. Tourists visit Chinatown and ride up and down the hills on the cable cars. Los Angeles is in southern California. It is the home of Hollywood and the movie industry.

For most of the year, the weather along the coast is sunny and mild. In the winter, there is snow in the mountains. In the south, the weather is hot and dry.

Agriculture and tourism are two of the major industries. California grows more than half of the nation's fruits and vegetables. Also, many Californians work in the tourist industry in the cities, parks, and resorts.

B ACADEMIC Write a report.

1. Choose a state in the United States. Each student should choose a different state.
2. Draw a map of the state. Show the borders, the capital, and major geographical features.
3. Complete the chart below. Look up information online.
