

'Are there more crayons?' the students ask.

'Yes, there are,' says the teacher.

'What are you doing?' asks the teacher.

'We're drawing and colouring pictures for our poster!' say the students.

Facts About Colours

Do you like painting? You can make painting even more fun by mixing colours.

Red, yellow and blue are called **primary colours**. You can mix primary colours to make other colours.

You can make even more colours by mixing primary and non-primary colours.

What other colours can you make by mixing colours?
