### Real and Unreal Conditionals

Conditional sentences are sentences with *if* in them. There are two types of unreal conditionals.

The present unreal conditional (*if* + simple past, *would/wouldn't* + verb) describes a situation that is not real now, but you can imagine it and its result.

The past unreal conditional (*if* + past perfect, *would/wouldn't have* + past participle) describes an unreal situation that wasn't true or didn't happen in the past.

In both types of conditional sentences, the *if* part can come before or after the result.
