Imagine that somebody told you to play more video games. Would you wonder why? Well, believe it or not, video games can be good for you. Can you believe it? We often hear that video games are bad for you. But research now shows that video games can positively affect the adolescent brain.

Studies show that when you play video games, your brain works faster. You also pay more attention and remember things better. These games can also help you make decisions and solve problems more quickly and easily.

Another benefit of video games is that it can improve eyesight. Studies show that people who don’t normally play video games improve their eyesight after a period of time playing them. In fact, doctors use video games to treat vision problems. For example, some people have one healthy eye and another that is not as strong. To strengthen the weak eye, people play video games and cover up the stronger eye.

Video games can even lower stress and help adolescents with their emotions. Researchers say that video games with different social scenes provide young people with real-world emotional experiences. For example, players can feel excited about doing well or feel disappointed if things don’t go their way. Players get to practise their emotions, so they are more prepared to handle them in the real world.

Finally, video games can prepare adolescents for jobs. For example, young people who play video games often have strong technology skills. These skills will be more and more important as our world continues to become more and more technical and digitised.
Read. Then tick T for True or F for False. Re-write the false statements to make them true.

1. We often hear about the bad effects of video games.  
2. Video games can treat infections.  
3. Players don’t experience real-world emotions when they play video games.  
4. Video games can help you make decisions quickly.

Read ‘The Benefits of Playing Video Games’ again. Fill in the table with the main idea of each paragraph.

Dear School Board,

As the teachers and staff know, most students have trouble paying attention in the mornings. That is because we are young teens and need as much sleep as we can get. We cannot focus because not getting enough sleep makes us tired. I know this from personal experience. Also, I have read several studies that show that the adolescent brain needs a lot of rest.

I have a plan that I hope will make everyone happy. I think that school should start 30 minutes later. That way, students can sleep a little longer. This will make us more focused in the mornings. More sleep will also help us control our emotions. For example, it will help us respond to challenges more positively. More sleep can even make our immune systems stronger!

Will this make school end later? No. My plan suggests that we shorten each class by a few minutes. That will give us 15 more minutes. Also, we will end lunch 15 minutes early. School can then end at the same time.

I hope you will consider my plan. It would make me happy. I want to help my fellow students! Thank you for your time.

Sincerely,

Rob Martin

Sleeping later will make me feel rested.
**WRITING**

When you write a classification essay, you classify, or sort, your topic into categories. For example, if your topic is the ‘negative effects of stress’, each negative effect will be a category. Once you decide on the categories, present each one and support it with examples. Use the following phrases to help you organise your essay:

- additionally
- another
- another type / way
- to begin with
- the final type / way
- finally
- first
- one type / way

---

**1 Organise.**

1. Your topic is *The Negative Effects of Stress*. Re-read the essay on page 37 of your book. Think about the negative effects of stress. What are they? These will be your categories. List four here.

<table>
<thead>
<tr>
<th>Categories: Negative Effects of Stress</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

2. Organise your writing. Circle the phrase you want to use and write the effect (from above) and an example on the lines below:

<table>
<thead>
<tr>
<th>Phrases</th>
<th>Category / Effect</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. to begin with / first</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. additionally / one way</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. another way / additionally</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. finally / the final way</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
