

Unit 7

Unit Opener **Extend** Worksheet F.7.1

1 Work in pairs. Read and discuss.

Scientists spend a lot of time studying outer space. They want to learn about what there is beyond Earth, including the stars and other planets and their moons. Why is learning about outer space important? What can still be learned? Is it a good use of time and money? Explain your opinion.

2 Read. Check ✓ the things that are found in outer space.

☐ 1. planet

☐ 6. rock

☐ 2. moon

☐ 7. astronaut

☐ 3. museum

☐ 8. rock star

☐ 4. star

☐ 9. comet

☐ 5. gas

☐ 10. telescope

3 Write. You want to be an astronaut, so you apply to go to space camp. Write a letter explaining why you're a good person for the camp.

4 Imagine you are traveling to outer space. What do you bring? What do you see? What unusual things happen? Write a journal entry or blog post.
